

Infrared Thermographic Inspection  
Of  
Selected Electro-Mechanical Equipment

Provided For  
Store 771--Atlanta, GA  
2/15/2005

**Summary:**

An Infrared Electrical / Mechanical inspection was performed on 2/15/2005 for Store 771--Atlanta, GA.

All of the items inspected are listed in the inventory section of this Thermal Trend report. Any anomalies that were found at the time of the inspection are documented in the Problem Detail section of this report with their appropriate associated data, i.e. thermograms, photos, comments, measurements, etc. In this case, the only problem that was documented was also repaired on the test date. Re-testing on the test date showed that the repair was effective. The final decision as to the repair priority of any and all problems in this report rests on the owners, management, or facility engineering team. The IR Thermographer assumes no liability directly or indirectly as a result of this inspection or the decisions made as to establishing the priority and timeline of repair decisions made by the owners, management, or facility engineering team.
